

The IT Effectiveness Group

10-Point Wireless Cost Reduction Program

1) Contracts

ITE's contract management service will benchmark your contract rates against the best available for similar spending. Our mobile contract experts then negotiate a more favorable contract that includes pricing and discount programs, SLA's, and terms & conditions that are not commonly known.

2) Optimization

We can significantly lower your monthly mobility cost through implementing special usage pooling and plan optimization programs. ITE then monitors each billing component and makes adjustments to minimize cost.

3) International

International expenses comprise a large and growing portion of most corporate wireless bills. ITE negotiates customized roaming packages and then proactively manages these global devices to reduce costs. We also can assist our clients in implementing mobile VoIP and global SIM card solutions to keep roaming costs under control.

4) Inventory Management

ITE will establish and maintain an accurate mobile inventory within a centralized database allowing you to track and manage physical device inventory as well as all inventories of mobile numbers tied to employees, departments and cost centers

5) Chargeback

Mobile expenses are correctly allocated back to cost centers or individual users while integrating with HR, Finance, and technology systems.

6) Invoice Audit and Assurance

According to Gartner, 12% – 20% of corporate telecom charges are in error and unfortunately for businesses, 85% of these charges are in the carrier's favor. ITE audits your carrier invoices to ensure your bills align with contracted rates. Billing errors are quickly identified and corrected, and any disputes are fully managed to resolution.

7) Reporting

Our summary level, detail, and customized reporting offer a clear and concise view into your telecommunications expenses and assets.

8) Vendor Management

ITE vendor management life-cycle program focuses on cost reduction while producing added benefits such as innovation, risk mitigation, increased customer satisfaction, and maximizing the value of your investments.

9) Consulting

Our expert team provides program/project management including but not limited to TEM software implementation, MDM execution, carrier consolidation, staff training, and advisory services

10) Policy

Organizations face the challenge of creating mobile policies that allow users to be productive, while at the same time protecting corporate data and assets. ITE helps clients successfully develop, implement, and communicate mobility policies that fit your specific needs based on industry best practices
